

EZgate – Smart Way to Control Your Gate

Use your mobile phone as a remote control, call it to open or use SMS commands to update your unit.

The unit stores list of authorized users; when someone calls the unit, the unit hangs-up the call and checks if the caller ID exists in the list, if it does, a pulse generated by internal relay, command the gate\door to open, No call cost for the user.

The unit holds up to 1600 authorized users and up to 400 temporary or limited users.

The EZgate can be program with simple SMS commands or via a PC software.
